

WHAT IS CLAIMED IS:

1. A seat supporting table, to which a barber or beauty chair can be detachably attached, wherein

the seat supporting table is provided with a sliding part which slides forward and backward toward a seat back face of the barber or beauty chair to be attached, and

the sliding part is provided with an attaching part for attaching the barber or beauty chair.

2. The seat supporting table for a barber or beauty chair described in claim 1, wherein

the sliding part is slid to a desired position along a guide rail for guiding a slide of the sliding part, and

a sliding power controlling part for controlling sliding power required for sliding the sliding part is provided.

3. The seat supporting table for a barber or beauty chair described in claim 1 or 2, wherein

the attaching part for attaching the barber or beauty chair is a projection to be engaged with an engaging part provided on a rear face of the barber or beauty chair.

4. A hair washer comprises a ball part provided with a neck receiving part for receiving a neck part of a person to be washed, a leg part for supporting the ball part, and a seat supporting table
